Race & Ethnicity

In order to capture the diversity of the state's population, we have presented Race & Ethnicity data in two ways. The first table shows percentages of the population that identify as one race only, with a row for those identifying as two or more races. The second table represents everyone who identifies with a race category, including those who identify as more than one race, meaning that the total can go over 100%. (Note: The Census treats race and ethnicity as separate categories.)

Race & Ethnicity

In order to capture the diversity of the state's population, we have presented Race & Ethnicity data in two ways. The first table shows percentages of the population that identify as one race only, with a row for those identifying as two or more races. The second table represents everyone who identifies with a race category, including those who identify as more than one race, meaning that the total can go over 100%. (Note: The Census treats race and ethnicity as separate categories.)

One Race	Statewide
White	70.4%
Black	5.5%
