

Testimony in Support of SB-2364
An Act Relating to Taxation – Personal Income Tax
Earned Income Tax Credit
Senate Committee on Finance
May 28, 2026
Kavya Gopinath, Policy Analyst, Economic Progress Institute

The Economic Progress Institute strongly supports Senator Felag’s SB-2364, which would increase Rhode Island’s Earned Income Tax Credit (EITC) from 16% to 30% of the federal EITC for tax years 2027 and beyond.

Rhode Islanders value hard work and financial freedom. Unfortunately, too many hard-working Rhode Islanders are struggling to meet their basic needs. According to the Economic Progress Institute's 2024 RI Standard of Need Report, 68% of single adults and 78% of single parents with two children cannot meet their basic needs without assistance. The Earned Income Tax Credit (EITC) is a tax credit that helps Rhode Island families by putting money back into the pockets of low- and modest-income working people. The credit is also “refundable,” meaning that it helps the lowest wage workers get money back from the IRS if the amount of their credit exceeds their tax liability.

The EITC is an effective anti-poverty measure. In 2018, the federal EITC lifted about 5.6 million people above the poverty line, including nearly 3 million children. The credit also made another 16.5 million people, including 6 million children, less poor.¹ By reducing poverty, the EITC also helps families and children thrive. Studies have shown that increasing the EITC is linked with improving infant and maternal health.² Moreover, when families receive larger state or federal EITCs, their children achieve better test scores than children from similar families who did not receive larger credit expansions. The children were also more likely to finish high school and go to college.³

Although the EITC is a powerful tool to lift hard-working Rhode Islanders out of poverty, RI's EITC is significantly lower than the rest of New England. As shown in *figure 1*, Connecticut and Massachusetts have state EITCs that are at 40% of the federal EITC. Vermont is at 38% and Maine is at 25% for workers with dependents, and at 50% for workers without dependents. Rhode Island is significantly behind at only 16%.

Figure 1:

SB-2364 would improve equity by helping low-income families in Rhode Island meet their basic needs. We strongly urge passage of SB-2364.
